

Maintain or change product orientation while conveying

CarrySmart® can do that!

Have an application where there's a requirement for change in direction, spacing of parts or pieces, orientation changes, or other difficult handling issues? Then you need **CarrySmart® Conveyors**...only from Wire Belt. We provide a number of conveying solutions such as:

- Spreading/converging conveyors
- Straight conveyors
- Shuttle conveyors
- Hybrid conveyors
- Full line of Flex-Turn® conveyors

Our Sales Representatives and Technical Service Engineers can help answer any questions you have about CarrySmart Conveyors.

Leasing options are available.

Custom Designed Solutions for Product Transport and Positioning

Our technology is shaped by your needs

- Custom-designed to accommodate your specific processing application
- Non-slip, positive drive
- Tight transfers with adjacent conveyors and processing equipment
- Easy to clean and maintain
- Smooth, gentle product handling for fragile products
- Stainless steel and HDPE construction
- Height adjustable +/- 2" standard
- Product is fully supported across the conveyor surface

Have a tough conveying challenge? No problem! Wire Belt is the company you need to call for the answer. Whatever your needs may be, you can count on our experienced engineering team of conveyor experts to custom design a solution that is right for you.
